

## Out of Temperature/ Adulterated

If donor provides you with a specimen that is out of temperature or adulterated:

1. Do not toss out specimen!!
2. Pour cold/adulterated specimen into transport tubes. Follow drug screen procedures.
3. Mark on COC that temperature is out of range.
4. Write in remarks section: "Temp out of range; next collection to be observed"
5. Seal transport tubes.
6. Fill out the rest of COC.
7. Perform next collection under Direct Observation. (Follow Direct Observation protocol)

## PROSTHETIC DEVICES

- 1) Ask donor to remove prosthetic device.
- 2) Donor can choose to either keep device or toss it into trash.
- 3) Once prosthetic device has been detected collection is deemed a "Refusal to Test"
- 4) Follow proper Refusal procedures.
