

SHY LUNG:

The employee is unable to produce enough air to complete a breath alcohol screen.

- 1) Have donor attempt at least 4-5 times.
- 2) Make sure that you explain/demonstrate how to do the test.
- 3) If after 4-5 attempts they still cannot complete test, you must notify supervisor.
Write in remarks section of B/A form "Shy Lung"
- 4) Donor must have to go to doctor to have a medical evaluation to see if there is a medical problem.
- 5) Proceed with the drug screen.
